

rubber and pvc crash doors

Specification

Doorfix Ring-gard range of Crash Doors are durable in construction and are an economical option for regularly used doorways.

Door panels are available in both lightweight PVC and heavy duty rubber.

The PVC used is ideally suited for food processing areas giving wipe-clean hygiene with maximum light transmission.

A range of light and heavy duty mild steel frames are available and can be powder-coated in any BS colour of your choice. PVC panels are also available in a range of colours.

- Complete range of specifications available
- Cost-effective solution to heat loss
- Easily maintained
- Can match corporate identity schemes

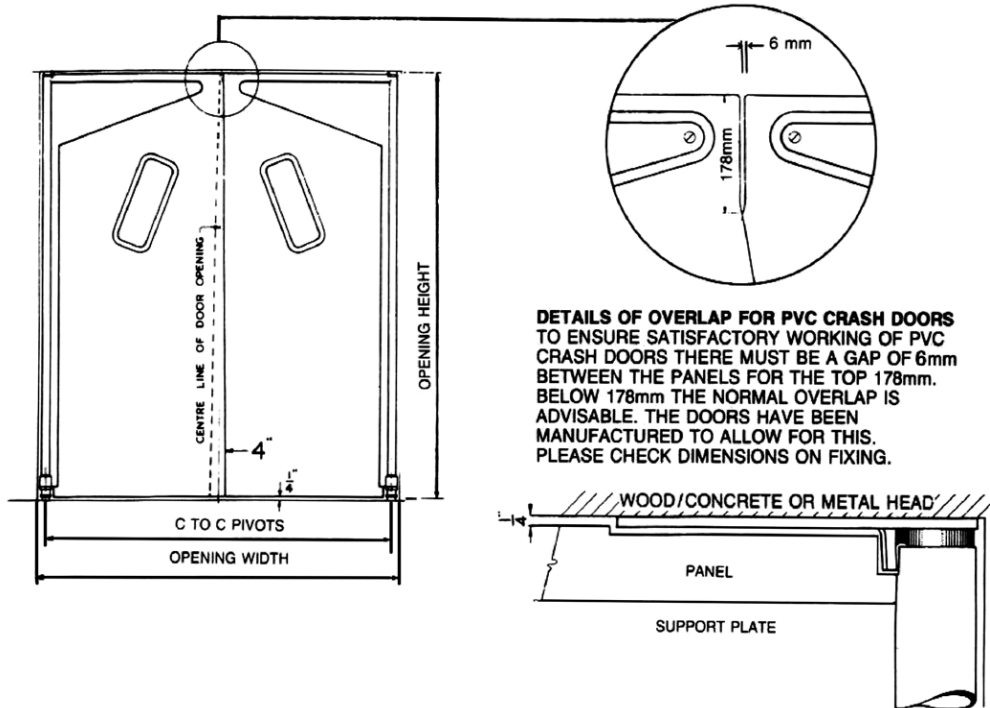

Maintenance

All our products are manufactured to a very high specification. However, planned maintenance can ensure trouble free operation.

Our Service Department can advise on a suitable maintenance agreement.

rubber and pvc crash doors

Door Panels

Choosing the correct door panel type can extend the lifespan of your flexible crash doors. The panels shown below are available in new doors and can also be supplied as replacements for existing crash doors.

Panel type 1:

All clear PVC 7mm or 10mm thick, suitable for light traffic. The most economical option available and allows maximum visibility.

Panel type 2:

Seeflex 7mm or 10mm thick PVC with a coloured lower section welded to a clear upper section. Also available in sandwich style, i.e. coloured upper and lower sections with a clear centre section. Recommended for manual traffic.

Panel type 3:

Composite clearflex. A black rubber lower section and a clear PVC upper section with the joint between the materials being effected by a ribbed rubber buffer strip.

Combinations available:- 7mm PVC/8mm rubber or 10mm PVC/12mm rubber.

Panel type 4:

Black rubber or coloured PVC with a rectangular aluminium framed perspex vision panel. Rubber available in 8mm or 12mm. PVC available in 7mm or 10mm. Vision panels 460mm x 150mm or 610mm x 230mm. Triangular vision panels are also available.

Panel type 5:

Black rubber or coloured PVC with a 281mm diameter aluminium framed perspex vision panel. Rubber available in 8mm or 12mm. PVC available in 7mm or 10mm.

Panel type 6:

Sandwich clearflex. Black rubber upper and lower sections with a clear PVC centre section. Joints between materials being effected with ribbed rubber buffer strips. Ideal for forklift traffic and higher doorways. Combinations available 7mm PVC and 8mm rubber or 10mm PVC and 12mm rubber.

PVC colours are available: black, grey, white, blue, red.

(Please note maximum size available on grey/white/blue/red panels is 1200mm wide per panel).

For any other size requirements, please contact our technical department.
